Effect of the different parameters governing the stability of drift wave in a magnetized plasma

F F Elakshar, *Indian J. Phys.* 1990, **64B** (3), 213-227

1. The name of the author should be read as : F F Elakshar instead of F F Elashkar which was due to misprint in the manuscript itself.
2. The lines 1-3 on p 224 should be read as : The local slab model predicts more stable modes although the same values of ω_R are estimated by the two models (Figure 8).
